Datasheet

HATO POWER PACK

A high quality power supply box which can hold up to two dedicated LED power supplies. A bright and beautiful design specially made for poultry houses.

Specifications

Operating voltage:	100~240VAC 150~350VDC
AC frequency:	50~60Hz
Power factor:	>0.95 at full load
Input current typical:	3.5A/115VAC 1.65A/230VAC (per power supply)
Efficiency:	95% at full load
Inrush current typical:	COLD START 70A(t =1010 μ measured at 50% I)
	at 230VAC
Max power supplies on cire	cuit breaker: B16: 4 unit, C16: 6 units (use inrush
	current limiter for more units)

Leakage current each power supply: Output voltage: Output Current: 0~6.7A /

r supply: <0.75mA 24.0~48.5VDC (0-100%) 0~6.7A Max load fuse (V+): UL 75W / CE 288W

Dim voltage input: Dim input impedance:

Expected average lifetime: Operating temp.: Nett weight: Material: Warranty: Application: 60.000 hours -10°C (14°F) < Ta < +45°C (113°F) 6.5kgs ABS 3 years For 48VDC dimmable lamps

1.0-10.0VDC (0-100%)

100kΩ (per power supply)

Dimensions

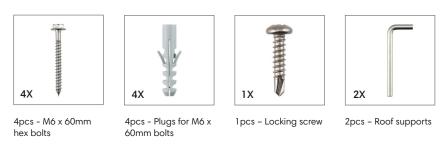

295 x 460 x 160 mm (width x length x height)

Datasheet

HATO POWER PACK

Accessories included

HATO POWER PACK 148D	Single power supply of 48VDC
HATO POWER PACK 248D	Two power supplies of 48VDC controlled together
HATO POWER PACK 248D-DDS	Two power supplies of 48VDC controlled
HATO POWER PACK 246D-DD3	separately for tunable white lamps

Separate accessories

Additional notes

HATO POWER PACK can be cleaned with high pressure cleaning when mounted on the wall. Separate fuses are include for either CE or UL. To comply with UL, each output should be fused with 1.6 Amps. UL: suitable for dry, damp and wet location
